In recent years, there has been a significant expansion of massage therapy and what are referred to as alternative and complementary therapies in our health care system. CCMT is committed to offering what some would see as forward thinking and advanced courses of study which may present scope of practice considerations. Because of variations in state regulation of scope of practice, client base, employment settings and/or specific practice orientation, each massage therapist is responsible for interpreting what he or she may do. CCMT cannot advise you as to your individual practice considerations. Although CCMT sponsors Continuing Education courses for educational and informational purposes, the opinions expressed in the courses by the instructors, their assistants and/or representatives do not necessarily reflect the opinions of CCMT.
